The VST-10K is an IEPE triaxial shock accelerometer offering dedicated shock measurement capability in three axis. With a $\pm 10000 \mathrm{~g}$ range the VST-10K combines the flexibility of IEPE (Integrated Electronics Piezoelectric) technology with the reliability of a robust titanium fully welded construction.
Kemo can also offer cables and signal conditioning solutions for use with their full range of accelerometers.

Kemo has a range of cable assemblies available for use with the VST-10K and other IEPE accelerometers.
