The GC10S-T is a general purpose monoaxial piezoelectric accelerometer with a side entry 10/32UNF microdot connector.

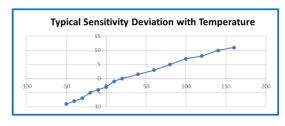

The base of the accelerometer has a tapped hole with a 10/32UNF thread for compatibility with many industry applications.

Featuring a shear design PZT-5 sensing element the GC10S-T provides high accuracy up to 10kHz Supplied with a standard 10/32UNF mounting stud (other studs are available on request.

It is recommended that the GC10S-T is used with a low noise cable from Kemo's range to reduce triboelectric noise.
